

A photograph of a woman with dark hair tied back, wearing a grey t-shirt, gently kissing a young child on the forehead. The child is wearing a patterned shirt and is looking up at the woman. The background is softly blurred, showing what appears to be a home setting with some toys. A large, semi-transparent blue circle is overlaid on the right side of the image, framing the text.

CerpassRx Partnership Overview

Who we are.

CerpassRx combines industry-leading pharmacy tools and technology expertise with best-in-class PBM services and clinical offerings to create a boutique alternative to the traditional PBM model. Built as an independent PBM, we serve groups that wish to regain control over the delivery and the access of their benefit offering.

Our experienced team of PBM leaders and thought innovators is central to the way we operate, as we leverage data, technology, and creativity to achieve dramatic financial changes in the benefit market. We focus on a “yes if” strategy with our clients, partnering with them to achieve their goals.

Why Us?

Quality Member Experience

Focusing on your members is our way of life at CerpasRx. Members are encouraged to access their pharmacy benefit plan resources in a number of ways:

Member Services Support Center:

Available to your members 24 hours a day, 7 days a week, 365 days a year. Whether your members need assistance obtaining a prior authorization or just need help understanding their pharmacy benefits, our team will provide a white glove member experience.

Mail Delivery and Specialty Programs:

Your members will conveniently receive maintenance and specialty prescriptions through the mail, as well as receive refill reminders and many other services. We also offer counseling, education and other value-added services to your members participating in our specialty pharmacy programs.

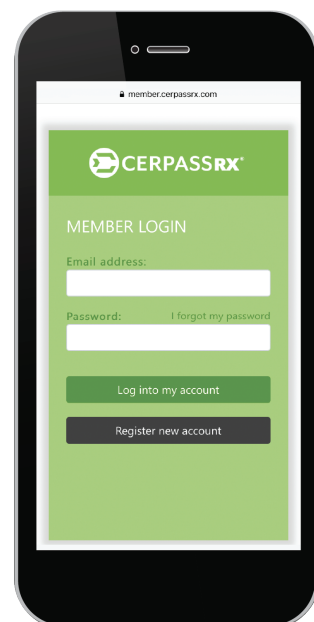

Member Web Portal and Mobile App:

Your members have two ways to access information and tools that help maximize your pharmacy benefits. Visit <http://www.cerpasrx.com/members-page/> or download the CerpasRx mobile app to access information and tools to help maximize your pharmacy benefit.

- Review medication history
- Locate participating pharmacies
- Track individual and family spend
- Schedule refill reminders
- Learn about medication side effects and interactions
- Compare pharmacy copays to determine the most cost-effective options

Get the app by searching for CerpasRx at the Apple App Store or Google Play.

Robust Clinical Program Portfolio

We offer clinical and specialty solutions that not only drive positive health outcomes for your membership, but also deliver savings to your plan.

- Zero Copay Program
- Personalized Diabetes Management Program
- New to Market Program
- Substance Abuse Prevention Program
- Medication Adherence Solution
- Prescription Alignment Program
- Specialty Care Management
- Immunization Program
- Price Inflation Protection Program
- Compound Management Tool Kit
- Non-Essential Drug List
- Proactive Prior Authorization
- Weight Loss Solution
- Pharmacogenomics Testing

Innovative Solutions

We think outside the box when it comes to clinical solutions and leverage cutting edge technology to offer ways to lower your plan's risk and increase your members' health.

Pharmacogenomics Testing:

The OneOme RightMed test is a physician-ordered comprehensive pharmacogenomic test that analyzes your DNA to determine how you metabolize certain medications. The analysis provided to your physician clearly identifies which prescription drugs are - or aren't - likely to work based on your genetic makeup and current prescription interactions.

The RightMed test was co-developed and exclusively licensed from Mayo Clinic and covers 340+ medications and 28 medical conditions. This pharmacogenomic test has multiple benefits, including the potential to:

Reduce or eliminate side effects

Prevent unintended interactions between drugs

Eliminate time and money wasted from trial and error to find the right drug

Provide years of more accurate, personalized prescriptions

Specialty Care Management:

In Partnership with InterveneRx, CerpasRx offers a robust specialty care management program that generates an ROI of 3:1.

Using a trained clinical care team of physicians, pharmacists and nurses we are able to improve prescribing and compliance leading to better prescription decisions, less waste and improved medication adherence.

Partnership Approach

At CerpessRx, we approach account management differently. Our purpose is not to “manage” you, but rather to partner with you to achieve your goals.

This partnership starts with a hands-on implementation focusing on your members and building a clinical strategy tailored to meet your needs. We walk through quarterly plan reviews evaluating your financial performance, trends and offer recommendations to help fulfill your annual goals. You can count on us to consistently evaluate your plan for opportunities to enhance your benefits and reach your objectives.

Client Satisfaction Score
9.8 out of 10
